

Sharp Aquos Crystal Sim Card Replacement

Replacing the Sim Card in your Sharp Aquos Crystal.

Written By: Felicia Imbriano

INTRODUCTION

If you receive a new phone or are having some performance issues (i.e weak signal, phone won't turn on, phone won't connect to data) you may need a new sim card.

Step 1 — Back Panel

- Peel back the back cover of the phone from the access point to remove it. It should come off easily using your hands.

Step 2 — Sim Card

- Push the sim card in, so that it pops out. Grab it with your fingers and slide it out.

i The sim card is located at the upper right corner below the camera.

To reassemble your device, follow these instructions in reverse order.
